

## FLUSHING HEPARINS

### IMPORTANT NEW PACKAGING CHANGE

Wockhardt UK's Hepsal<sup>®</sup> and Canusal<sup>®</sup> packaging (currently in the heritage CP Pharmaceuticals design) has changed and from now on the product will revert to its generic name of Heparin Sodium Flushing Solution:

Current Description	New Description	Strength	Pack Size
Canusal <sup>®</sup>	<b>Heparin Sodium Flushing Solution (preservative free) ampoules</b>	100 i.u./ml	10 x 2ml
Hepsal <sup>®</sup>	<b>Heparin Sodium Flushing Solution (preservative free) ampoules</b>	10 i.u./ml	10 x 5ml

In addition both Heparin Sodium Flushing Solutions will be available in Wockhardt UK's new safer packaging design, which has been reviewed and commended by the NPSA.
